Recent Work Experience

This Dot Labs Raleigh, NC (remote)
Engineering Lead Oct 2024 - Current

- Lead Engineer for key This Dot Labs customer projects such as OpenAI, HUDL, Wikimedia, Primerica
- Manager of mobile engineering team: mentoring, performing reviews and conducting one on ones
- Led development client teams through complex refactors, rewrites, migrations, optimizations, and development sprints whose on-time completion was key for company strategic goals.
- Presented on behalf of This Dot Labs at global technology conferences and in digital content on topics such as react-native, coding agents, LLM models, and change management for teams undergoing AI enablement initiatives

vTestify Raleigh, NC
Principal Engineer & CTO Aug 2019 - Dec 2024

- Architected and built a WebRTC-based digital deposition platform for the U.S. legal industry
- Built real-time, multi-channel testimony transcription using the Web Audio API and OpenAI Whisper
- Drove 10x revenue growth by building enterprise white-label capabilities that enabled B2B sales
- Partnered directly with Sales and Product as a forward-deployed engineer to design and deliver custom solutions for strategic customers
- Built the engineering organization's hiring, interviewing, and team management processes
- Led architecture, development, and code review across JavaScript, Ruby, Python, and Go systems

Freelance Software Engineer Raleigh, NC
Self-Employed Nov 2017 - Dec 2019

- Operated as an independent contract-for-hire software engineer specializing in building web and mobile products
- Built custom software for companies such as McKesson, Dana-Farber, Duke Health, Adwerx and MAC Cosmetics
- Sourced contract work, created SOWs and managed sub-contractors spanning across multiple projects
- Provided expert training services for company teams looking to upskill their engineers into development tools

Smashing Boxes Raleigh, NC
Lead Software Engineer - Director of Technology Aug 2014 - Nov 2017

- Hired as Lead Engineer of backend team, later promoted to Director of Technology overseeing an engineering team of 30+ individuals across 3 disciplines (Frontend, Backend, and Mobile)
- Acted as a direct contributor to core company Web and Mobile App projects (React, iOS/Swift, Ruby on Rails)
- Served as engineering team representative in company resourcing and sales meetings

Assetricity LLC Raleigh, NC
Software Engineer July 2009 - Aug 2014

- Built condition based maintenance software in Ruby on Rails and deployed in IBM Websphere via JRuby
- Attended ISO standards committee meetings to report back to technical teams or answer questions when needed
- Built an Ember.js powered P&ID viewer for oil and gas refinery layout specifications
- Created XML Schema documents to reinforce XML standard structure dictated by ISO standards committees
- Maintained company internal software systems and web presence

Education

East Carolina University **Greenville, NC**
BS, Major Computer Science with Business Minor 2006-2009

Leadership & Community Activities

Triangle Developers Current
Founder - Organizer

- Founded community meetup containing over 3,000 software engineers across the NC Triangle area
- Tech community organizer since 2012 hosting regular community events, networking hours, and tech talks in partnership with companies across the NC RTP area
- All Things Open talk selection committee member since 2014

All Things Open Current
Speaker selection committee member and technical content producer

- Participate in All Things Open speaker selection process for engineering focused event tracks
- Attended and spoke at several of All Things Open's conferences and meetups across the east coast
- Fostered relationships between All Things Open and other local community meetups in Raleigh NC

Rails Bridge 2015-2018
Founder

- Founded Rails Bridge chapter alongside a team of engineers committed to increasing diversity in tech
- Developed Rails Bridge curriculum where we took non-coders and immersed them in a day-long hackathon where they get to experience building a Ruby on Rails app from 0 to 100
- Oversaw selection of volunteers that assist attendees with computer setup and problem solving

The Iron Yard 2015-2017
Advisory Board Member & Guest Instructor

- Provided input to Iron Yard curriculum writers on which technologies were most relevant for students to learn
- Guest speaker to students on emerging topics such as Docker and React.js
- Mentored select students to provide a hands-on perspective of what being a Software Engineer is like

Triangle Javascript 2014-2019
Co-Organizer

- Attended and led meetups across the NC RTP Area
- Presented talks to members on Javascript concept mostly tied to React and React Native (circa 2016)
- Oversaw general coordination with speakers, location, and attendees

Triangle Ruby 2012-2019
Founder

- Formed Triangle Ruby meetup because I wanted there to be a strong Ruby community in my local city
- Acted as sole organizer for over 6 years doing speaker selection and coordination between locations and meetup sponsors
- Hosted and spoke at several local corporate headquarters across the NC Triangle area for Ruby developers such as Metlife, IBM, Bandwidth, Webassign, Microsoft, and Duke University
