Full Stack Software Engineer

Full stack software engineer with 16+ years building web and mobile products for startups and enterprise businesses. Hands-on technical leader experienced in using AI tools and integrating AI into products. Has worked as both a manager and individual contributor on teams of all sizes, taking ownership of feature development across every layer of the stack.

Recent Work Experience

This Dot Labs Raleigh, NC (remote)
Engineering Lead Dec 2024 - Current

- Lead engineering for client projects including OpenAI, HUDL, Wikimedia, and Primerica, contributing expertise in JavaScript, React, Vue, Go, Ruby, Java, Web APIs, software architecture, and software development lifecycles.
- Managed the mobile engineering team, including mentoring, performance reviews, and one-on-ones.
- Led client engineering teams through refactors, delivering on time to support strategic business goals.
- Presented at global technology conferences and in digital content on full stack development with coding agents, LLMs, and AI adoption in engineering teams.

vTestify Raleigh, NC
Full Stack Principal Engineer & CTO Aug 2019 - Dec 2024

- Built vTestify's digital videoconference court reporting deposition platform for the U.S. legal industry.
- Built real-time, multi-channel testimony transcription by integrating browser audio capture through the Web Audio API with OpenAI Whisper as well as custom video clipping and splicing functionality with ffmpeg.
- Drove 10x revenue growth by scaling simultaneous video streams and managing DevOps for enterprise customers.
- Architected solutions for strategic customers, partnering directly with lawyers, sales and product teams.

Freelance Full Stack Software Engineer Raleigh, NC
Self-Employed Nov 2017 - Dec 2019

- Delivered full stack web and mobile products as an independent engineer, working across React, Angular, Vue, React Native, Ruby on Rails, REST APIs, and GraphQL.
- Built custom software for companies such as McKesson, Dana-Farber, Duke Health, Adwerx and MAC Cosmetics.
- Sourced contract work, created SOWs and managed subcontractors across multiple projects.
- Trained client engineering teams in software development tools and delivery lifecycles.

Smashing Boxes Raleigh, NC
Lead Software Engineer - Director of Technology Aug 2014 - Nov 2017

- Led backend engineering before promotion to Director of Technology, overseeing a team of 20+ engineers.
- Oversaw DevOps for as many as 10 simultaneous in-development projects through custom DevOps tooling.
- Built web and mobile applications across React frontends, Ruby on Rails backends, and iOS/Swift applications.
- Served as engineering team representative in company resourcing and sales meetings.

Assetricity LLC Raleigh, NC
Software Engineer July 2009 - Aug 2014

- Built condition-based maintenance software with Ruby on Rails and deployed it to IBM WebSphere via JRuby.
- Built a JavaScript SPA frontend for viewing maintenance and diagnostic data for industrial manufacturing facilities.
- Performed DevOps tasks for release management, testing and rollback as needed by the engineering team.
- Defined XML schemas (XSD) and XSLT transformations to enforce ISO-standard data structures for industrial asset information.

Education

East Carolina University **Greenville, NC**
BS, Major Computer Science with Business Minor 2006-2009

Leadership & Community Activities

Triangle Developers Current
Founder - Organizer

- Founded community meetup containing over 3,000 software engineers across the NC Triangle area.
- Tech community organizer since 2012 hosting regular community events, networking hours, and tech talks in partnership with companies across the NC RTP area.

All Things Open Current
Speaker selection committee member and technical content producer

- Participate in All Things Open speaker selection process for engineering focused event tracks.
- Attended and spoke at several of All Things Open's conferences and meetups across the east coast.
- Fostered relationships between All Things Open and other local community meetups in Raleigh NC.

Rails Bridge 2015-2018
Founder

- Founded Rails Bridge chapter alongside a team of engineers committed to increasing diversity in tech.
- Developed and taught a day-long curriculum that guided beginners through building a complete Ruby on Rails application.

The Iron Yard 2015-2017
Advisory Board Member & Guest Instructor

- Provided input to Iron Yard curriculum writers on which technologies were most relevant for students to learn.
- Taught emerging web development and deployment technologies, including React and Docker, as a guest instructor.
- Mentored select students to provide a hands-on perspective of what being a Software Engineer is like.

Triangle JavaScript 2014-2019
Co-Organizer

- Presented talks to members on JavaScript concepts mostly tied to React and React Native.
- Handled operations, communications with host, acquiring food and scheduling speakers for meetups.

Triangle Ruby 2012-2019
Founder

- Hosted Ruby talks at MetLife, IBM, Bandwidth, WebAssign, Microsoft, and Duke University.
- Handled operations, communications with host, acquiring food and scheduling speakers for meetups.
